

PLAN YOUR PROJECT

At Azule Kitchens our reputation has been built on many years of trust, superior craftsmanship and customer service. Our company is focused on providing exceptional results through and our proven process we ensure your new cabinetry will have a lasting impression with the perfect balance of lifestyle, personality and functionality.

Our planning guide helps provide your designer with the information needed to start the design and quoting process. After your design is complete, your designer will provide you with a quotation for your cabinetry. We recommend visiting our 'Plan Your Project' page on our website for helpful information.

START HERE:

- You will need: a tape measure, pencil or pen, a phone camera or camera and an extra set of hands if available.
- View the 4 pages in this package. Start by following the example floor plan on page 2 and guidelines below.
- Draw the floor plan of the room in which the cabinetry is planned to go on page 3 and continue to page 4.
- All measurements to be in inches only. Do not include any existing cabinetry measurements in the drawing.
- Start by measuring the sink first. Then measure the total length of all walls from corner to corner or wall to wall.
- Next, measure the widths of all windows, doors and walkways from the outside edge of the trim to the outside edge of the trim. Be sure to indicate the direction of all door swings.
- Measure the rooms ceiling height. Indicate any bulkheads, special items being kept or vaulted ceiling areas.
- **APPLIANCES:** Insert the sizes of your existing or new appliances in area provided on page 4. If you do not know, leave the area blank. Your designer will help you to determine your appliances.
- **DOUBLE CHECK:** All measurements and that all measurements are included. Example: All the walls lengths, window widths, door and walkway widths, ceiling height, etc.
